

# Sacred Heart Catholic Primary School

## Sports Funding Impact and Analysis Statement

On the following pages are tables showing impact of Government sports funding for 2016 - 2017

Also details of our funding for this year – 2017 - 2018

## Background

The Government has provided funding until 2020 to provide new, substantial primary school sport funding. This funding is being jointly provided by the Departments for Education, Health and Culture, Media and Sport, and will see money going directly to primary school Head Teachers and Principals to spend on improving the quality of sport and PE for all their children.

The sport funding can only be spent on sport and PE provision in schools. OFSTED will play a significant role in ensuring that schools target this funding in areas which will lead to clear outcomes in raising standards and opportunities in PE and school sport for all children throughout the Primary Phase. All schools receive a lump sum of £16,000 plus a premium of £10 per pupil.

We are proud of the PE curriculum and sporting opportunities that we have on offer at Sacred Heart Catholic School. We believe that the purpose of Physical Education is inspire and motivate all children to be active in their lives, enabling them to become physically confident. The importance of living a healthy lifestyle and taking regular exercise needs be encouraged, alongside the teaching of key fundamental skills. Children should have opportunities to apply the skills they have learnt in competitive situations, either within teams or individually. As a result, key values, including team work, resilience, determination and fair play, can be taught and promoted in an active way. We believe these key values are vital for pupils' development because lots of these are transferable skills, which can be applied to wider life experiences.

Furthermore, we believe that P.E plays a critical role in educating the whole student. Research supports the importance of movement in educating both mind and body. It also helps the children to make informed choices and understand the value of leading a physically active lifestyle. The benefits of physical education can affect both academic learning and physical activity patterns. The healthy, physically active child is more likely to be academically motivated, alert, and successful. In the preschool and primary years, active play may be positively related to motor abilities and cognitive development. We believe that quality physical education teaching is essential in developing motor skills, physical fitness and understanding of concepts that foster lifelong healthy lifestyles.

At Sacred Heart Primary School, we ensure that the children receive the highest quality of teaching during their PE sessions. We strive to improve children's ability and skills in sport as well as having a significant impact on the overall fitness and well-being of the children. We aim for all children to develop positive attitudes towards physical activity ensuring all lessons are accessible by providing a range of different activities to challenge every pupil. We believe in challenging ourselves to always reach for the next goal and beating our personal best; we endeavour to instil this personal challenge in our children. As part of the 2012 Olympic legacy, we strongly encourage children to take part in sport outside of school and are looking to form further links with local clubs within the community.

## Impact of Sport Premium fund during academic year 2016-2017:

Academic Year: 2016/2017		Total fund allocated: £9790					
A	B	C	D	E	F	G	H
PE and Sport Premium Key Outcome Indicator	School Focus/ planned <b>Impact on pupils</b>	Actions to Achieve	Planned Funding	Actual Funding	Evidence	Actual Impact (following Review) <b>on pupils</b>	Sustainability/ Next Steps
